Dear Chairman and Commissioners,

Docket E-00000xx-13-0219

We are confronted with the urgency of now. In this unfolding conundrum of proposed changes on November 4, 2014; the elimination of energy efficiency standards across our great state of Arizona would excuse some utilities from cutting waste, hold our utility consumers captive to higher bills, set non binding, energy saving goals through a process lead by utilities that will under cut consumer savings, eliminate the Societal Cost Test which has been standard practice and successful in Arizona and many other states.

We need to only make the right choice: "turn-down this pending proposal". If we will make the right choice, we will be able to transform this single minded discord of the past and support the collective voice of our small businesses and consumers that will fully implement the standards and create more than 10 thousand jobs, \$9 billion in business and consumer savings, and more than 10 million tons of carbon dioxide.

If we will make the right choice, we will be able to speed up the day all over Arizona when our collective voice prevails uniting us as Arizonans acting on a vision of doing more not less to cut energy waste.

As an energy efficient small business owner and energy consumer this proposal would devastate my statewide clients, my family income and my local community in what we are trying to accomplish; living in more comfortable, safe and efficient homes.

Please continue to support the Energy Efficient Standards adopted in 2010.

Sincerely,

Hugh D. Wolf
